2:00 p.m.**

**KERRVILLE, TEXAS
Hill Country Youth Exhibit Center**

WELCOME
to the Seventeenth
Haby-Lockhart-Ross-Speck
Angora Goat Production Sale

Conducted by Auctioneer Mark Tillman

*This year's catalog is dedicated to the
Tooter Shanklin and Maurice Shelton Families*

Tooter and Lillie Shanklin have always been a team for getting their many activities accomplished on the ranch, in the Rocksprings community, and in the Angora goat industry. Tooter's grandfather, T.C. Hampton, was the first rancher to have registered Angora goats and border collies in Edwards county. Tooter's father, Souli, continued breeding up the angoras. The third, fourth, and fifth generations are still working seriously with their Angoras.

During the ups and downs of the mohair cycles, Tooter was always supporting the AAGBA. No one was more faithful in attending the meetings, checking on the office, and accepting the responsibilities of serving on the AAGBA's Executive Committee even after he served as president in 1984-86. Breeders knew that Tooter could be depended upon to do what was right and what needed to be done. Tooter and Lillie seldom, if ever, missed a Mohair Council or Texas Mohair Producer Board meeting. They always accepted the position of serving as a director seriously. For years after the drought of the 50's, Tooter and Lillie, with their partners, handled thousands of goats in the order buying business. At the same time they had developed a reputation for raising quality Polo horses. The family is still active with the horses. Tooter's business experiences qualified him to serve as a director of the Federal Land Bank.

All three children and their spouses are still on the land and helping others. Martha Alice's family lives in Anson. Jake and Hillary and Souli and Patty are ranching in Rocksprings with their families. We all know Patty at the AAGBA.

Many of us remember when Tooter and Lillie would do the "Cotton-Eye Joe" at the Rocksprings July Fourth dances. Everybody would just step aside to admire the couple glide about so easy. Truly amazing! We need more folks like you in our industry.

Dr. Maurice Shelton has been a true friend of the sheep and goat industry - not just here in the Edwards Plateau, but worldwide. Trained as a geneticist, his research at McGregor, Sonora and San Angelo covered a wide range of activities. Dr. Shelton simply did it all! He had a knack for not wasting time. He could write up the results of a project for publication in scientific journals and then attend producer meetings to present his observations in practical terms. Projects ranged from drench comparisons; predator control with electric fencing and guard dogs; with Dr. Ed Huston published in the 1960's, The Production and Nutritional Guidelines for Angora Goats, that has gone all over the world; surgery to develop teaser bucks to improve conception rates; the

collection of adrenal and pituitary glands from Angora goats to study reasons for abortion; expanded the scope of the famous Sonora Rambouillet Sheep Performance Test; developed the index formula for the Angora Performance Test; South Africa was so impressed with his research that they had him to spend several weeks there to evaluate their industry; extended time was spent in Australia, South America and other nations evaluating the genetics of all types of sheep; worked with Dr. Lupton to evaluate the potential of cashmere from Spanish goats in Texas; worked with the pioneer meat goat breeders. The list goes on.

Dr. Shelton and his wife, Lucy are retired now but they are still ranching, dancing, and working with their hair sheep. We want to thank you and Lucy again, for teaching us so much.

Let us keep in our prayers, concern for Jo Ann Gardner, John Dittmar, Waldemar Kroll, Tooter Shanklin and Laura Schmidt.

Shearing Dates:

Ross Ranch; HLRS; and Speck Ranch - All shorn late January

Even though we breeders have similar standards and breeding programs, the animals have been raised in different environments, management and kidding dates. Please make note of these differences and make visual comparisons of individual animals from within that specific herd.

BREEDER'S GUARANTEE - Should any goat be proven to be a non-breeder its first breeding season, please notify the particular breeder. Common sense and fairness by both the seller and buyer should prevail. If the animal has not been neglected, fed excessively, exposed to a disease after the sale, loaned out or sold to another party, etc., the animal may be returned for replacement after agreement by the seller. **No guarantee can be made as to how the goat will cross with your goats.** The goats should be allowed adequate time to adapt to their new location after transportation.

TERMS are cash or check. Should any dispute arise from the taking of bids, the auctioneer's decision will be final.

HEALTH CERTIFICATES - Any potential buyer should check in advance with his state's veterinary health requirements and be prepared to make necessary arrangements.

REFERENCE SIRES

A.B. HOBSON & SONS MARTYRSFORD STUD

76 - This buck was sired by K131, the twin to the Martyrsford buck that sold for 110,000 Rand, a world record price. He combines the size, muscle, thickness, and correctness of a superior meat goat with a typical soft South African mohair fleece.

422 - This buck was Mike Hobson's selection for the partnership. His sire was an outstanding producer for the Hobsons. Phenotypically this buck is well balanced but not flashy. However, he is a "blue blood" stud, he consistently produces quality kids, both straight South African and "cross".

04 - In 1994 Mike Hobson, Fred Speck, and Hayden Haby returned to South Africa and selected this buck for the second importation. His conformation is near perfect. His offspring have fine fleeces.

80 - This buck was also selected by Hobson, Speck, and Haby for the second importation. His sire was a Thorn Park buck purchased at the dispersal sale by A.B. Hobson and Brett Wienand. Haby really likes this big, tall long bodied buck.

HABY-LOCKHART-ROSS-SPECK

HLRS 60- Out of 80 and a "Lockdale" doe imported from South Africa, this buck combines a long stapled fleece with a very correct body conformation. The yearling does on Laura Speck's 1999 Show Circuit were both out of this buck. His two sons at the Sonora Test had the longest staple length in 1999.

HLRS 106- Combining a uniform, ringlet fleece with a wide correct body, this buck is also open faced. His sire is 76 and his dam is an imported South African Lockdale doe.

HLRS 153- This son of 04 combines an excellent conformation with a fine, uniform fleece. His dam is an imported S.A. Thorn Park doe.

HLRS 438-Sired by HLRS60 (the extra long staple sire) and out of HLRS98-168 who was sired by HLRS 12. Without a doubt 438 is the finest, most uniform buck that HLRS has raised and he is breeding true. His son, HLRS 606 was at the 2003 Performance Test and has an excellent body and fleece. This year a son, HLRS 644 was at 2004 Performance Test

HLRS 484- A son of HLRS 106, he has a wide body and ringlet fleece. His dam is a top Mike Hobson doe from South Africa.

ROSS RANCH SIRES

JBR 9735 - He has a terrific body and mohair tail like his sire, Hobson 04. He indexed in the top ten at the 1998 P.T. We brought him home to breed because he was taller and finer than his sire. His dam is a medium sized Ross-Kuebel doe (ten years old and has raised a kid every year); she was by the great fine haired Kuebel 814.

ROSS RANCH SIRES, CON'T

JBR 9946 - This open face buck was in the top 10 indexing bucks at the 2000 performance test. He is sired by FLS 1516 that we purchased in 1998. (A son of FLS 607 who was sired by FLS 404). 9946's dam was sired by HLRS 28. One of his sons was the high indexing buck at the 2003 Performance Test.

JBR 9973 - Another 2000 P.T. buck that we bought home to use because of his size and beautiful ringlet style on his neck. He was sired by HLRS 28.

Probst 1630 - We have always looked forward to seeing the Probst goats at the performance test. In 2001, yellow tag 348, in our opinion was the most stylish, alert, and well balanced buck on the test. He still carries a stylish fleece. His sire was FLS 1421. He is a son of Hobson 422 and out of a daughter of FLS 249, the buck who was so fine and uniform on his neck.

163 P.T. - (Performance test). This large open faced buck of Flach – Schmidt (GLS) breeding was purchased in 1990 because of his super body and leg structure.

JBR 0125 - Some may remember lot 48 in the 2002 sale. We retained a one-half interest in this son of HLRS 60 because 0125 JBR had the finest, most uniform fleece with an open face and large full scrotum of any south African kid that we had raised. His dam was a granddaughter of Hobson 76 which helped reinforce body structure. Please note Lots 33 and 55. They are carrying more lanolin than their sire and still have the fine lock on the neck.

JBR 0152 - is rich in South African breeding. His open faced mother, sired by Hobson 04 and out of a Ross doe, had the most beautiful uniform, "pencil" ringlet that I have ever seen. The sire, (show potential was well covered) was a P.T. buck by HLRS 60 and out of a Ross doe by HLRS 28. Notice the fine, stylish neck on Lots 37, 41, 47 and 49.

SPECK RANCH SIRES

H-584 "Superfine" - This legendary Haby stud, along with H-787 "Son of Champ", has provided the foundation of our herd. Both bloodlines have produced champions for Speck Angoras at all major shows in 1990 through 1999.

FLS2-404 - This buck bred true and produced super kids. He had excellent conformation with a wide spring of ribs, wide hindquarters, straight back legs, and strong typical horns. He carried a fine, ringlet yearling grade fleece and was uniform from neck to breech. His sire is 4P-210, grand sire is FLS8-43, and great-grand sire is H-787.

FLS1-249 - This was one of the finest fleeced, most uniform bucks we had. His sire is FLS9-68 and his dam, FLS9-76, is a daughter of "Superfine". In 1994 he was the first place Aged Buck at the Kerrville, San Antonio, and Houston Jr. Stock Shows.

SPECK RANCH SIRES, con't:

FLS6-1382- When Hayden Haby & Jesse Lockhart saw this buck as a yearling, they called him the "perfect buck". He has correct horns, thick body, and a fine ringlet long stapled fleece with kid hair. He is a son of 404 and has produced many excellent kids.

FLS7-1593- Out of HLRS 422, this 1/2 TX buck is long bodied, big, and has a dense ringlet fleece.

FLS8-1810- A son of 1382, this buck still carries a fine ringlet kid fleece and has produced many excellent kids. He is one of our top producers. His mother is out of 249 and was on the show circuit. She won the Grand Champion Goat of Show in Kerrville in 1997.

FLS8-1893- This is a big robust son of 1382 that won Champion Buck as a kid at four major shows in Laura's last year of showing. He has excellent body conformation and a fine uniform fleece.

FLS9-2062- Out of Hobson 422, this is an open faced, upstanding alert buck with a fine uniform fleece and excellent conformation. His mother is a fine fleeced doe sired by FLS2-404.

FLS9-2224- A son of FLS6-1382, this is a showy, big, extremely fine fleeced uniform ringlet haired buck.

FLS0-2350- This is a fine-haired, showy buck, 100% Texan, and is a full brother to FLS8-1810. He also produces good kids.

FLS0-2392- A son of 1810, this uniform-fleeced buck's dam is out of FLS1-249.

FLS0-2593- This 1810 son is 100% Texas bred and has produced excellent kids. He has a super-fine, ringlet fleece.

FLS0-2624- This buck is 50% South African out of HLRS 28. He has an excellent conformation with thick spring of ribs and a square hip. His fleece is ringlet, fine and uniform. The dam is 404 bloodline.

FLS0-2763- This son of FLS8-1810 is upstanding, robust, and carries a fine fleece. This year we kept two of his offspring as stud bucks.

FLS0-2671- This is a son of 404 with an excellent conformation. He is wide-bodied, level rumped, walks wide, and is showy with a mohair tail. He produces excellent offspring. He is 75% Texan and carries a fine fleece. We credit his body conformation to both his South African grandfather(Hobson-04) and FLS2-404.

SPECK RANCH SIRES, con't:

FLS1-2844- A full brother to FLS8-1810 and FLS0-2350, this son of 1382 is also a consistent producer of excellent offspring.

FLS1-2898- A son of FLS9-2224, this is our largest stud buck with an excellent thick body and ringlet uniform kid fleece. I own 1/2 interest in this buck with the Earwood family. His body can be attributed to his 1/2 S.A. mother out of HLRS-422. He produces excellent kids.

AFE-673- This Earwood buck is out of FLS6-1337 (607 son) and FLS9-2334. His dam is a 404 granddaughter. The buck is upstanding, proud, open faced, and has a mohair tail. His body conformation is excellent w/ thick spring of ribs and correct hip structure.

YEARLING DOES

Lot#	GOAT ID	SIRE	DAM	BREED	PRICE
------	---------	------	-----	-------	-------

1	FLS3 3611	FLS0-2593	FLS5-1001	75% TX	_____
---	-----------	-----------	-----------	--------	-------

This doe carries a dense ringlet uniform soft fleece. Her mother is 1/2 TX out of HLRS 422. FLS5-1001 produced several top selling bucks in past sales and one stud buck.

2	FLS3 3449	FLS8-1810	FLS7-1560	75% TX	_____
---	-----------	-----------	-----------	--------	-------

This doe's mother is 1/2 TX out of HLRS 60. She was a top show doe in Laura's show string. We like this doe's fleece; ringlet, uniform, long stapled and fine. She could be stud doe potential.

3	FLS3 3422	FLS0-2350	FLS4-733	100% TX	_____
---	-----------	-----------	----------	---------	-------

Her mother is a full sister to FLS1-249. This doe is long bodied, showy, and has a long staple length, soft, fine fleece with style and character. She could also be a stud doe potential.

4	FLS3 3668	FLS1-2844	FLS8-1912	100% TX	_____
---	-----------	-----------	-----------	---------	-------

Another one of our "keeper does" we put in this year's sale, this doe has a splendid ringlet kid fleece. She is big, long bodied, and a stud potential doe. Her mother is a 404 granddaughter.

5	FLS3 3606	FLS1-2763	FLS7-1480	100% TX	_____
---	-----------	-----------	-----------	---------	-------

She shows her father's upstanding large thick ribbed body. She is showy with long staple length of fleece. Her dam is a 404 daughter.
