HLRS wants to thank our family members who help with the sale and its preparation and other friends who have been so helpful over the years.

This Year's Catalog on our 37th Anniversary is Dedicated to **OUR BUYERS**

It would be impossible to express how much we appreciate you as buyers and your support of our sales over the past thirty-six years. While we would like to mention everyone who attended our sales, and bought our goats, it would be impossible to do in this brief space. But, you know who you are - and we appreciate you very much.

We try to provide animals that can be used by commercial ranchers, by the registered Angora goat breeders and by the children with show projects. To provide animals that fit these niches remains a challenge. We try to offer a selection that will fit your needs.

We have imported goats from South Africa on four different occasions. First in 1994, then in 1996 directly from South Africa. That window closed (foot and mouth ban reimposed) and in 2009 and 2010 we imported embryos to Australia, then live goats to Texas; dealing with the USDA was frustrating and challenging. These were the first Angoras imported since the 1920's because of the foot and mouth ban against South Africa. The full story would require a book. The South African goats offered improvements which have benefited our overall herd. These goats have great body conformation, freedom from kemp, long staple length and the outside genetics offered hybrid vigor. The shearers state they are easier to shear. We like the improvements when incorporated with the fineness of "Texas" goats.

The goats offered in the sale have not been "fleece worked" and the fleeces have their natural, unaltered luster. They will look the same with the next fleece. Our high percentage "Texas" goats keep their fineness even on full feed. On the range the pure South African goats will actually be one grade finer; on full feed they tend to be coarser by one grade.

It is difficult for a child with a show project to buy a goat that will win that year. I usually tell breeders that with our bloodlines they can potentially raise winners in one or two generations, and that has happened recently. A doe purchased one year and a buck purchased the next year produced a winning goat that won the child over \$30,000 in college scholarships. One exception happened last year. A buck offered in last year's sale won the exhibitor a \$10,000 college scholarship! How you combine the goats when breeding and take care of the goats makes a difference in their quality and performance.

Feedback from commercial breeders has always been positive. They have been happy with the quality of the kids they raise.

Again, we cannot stress enough *how much* we appreciate you BUYERS!

REFERENCE SIREs

A.B. Hobson & Sons Martysford Stud

76 (1991) - This buck was sired by K131, the twin to the Martysford buck that sold for 110,000 Rand, a world record price. He combined the size, muscle, thickness, and correctness of a superior meat goat with a typical soft South African mohair fleece.

422 (1991) - This buck was Mike Hobson's selection for the partnership. His sire was an outstanding producer for the Hobsons. Phenotypically this buck was well balanced but not flashy. However, he was a "blue blood" stud, he consistently produced quality kids, both straight South African and "cross".

04 (1993) - In 1994 Mike Hobson, Fred Speck, and Hayden Haby returned to South Africa and selected this buck for the second importation. His conformation was near perfect. His offspring have fine fleeces.

80 (1993) - This buck was also selected by Hobson, Speck, and Haby for the second importation. His sire was a Thorn Park buck purchased at the dispersal sale by A.B. Hobson and Brett Wienand. Haby really liked this big, tall long bodied buck.
